Student Remarks

Seems like theres a lot of power given to TAs. This sometimes hinders interaction between students & the instructor resulting into immature decision making in various cases by the TA. I highly appreciate the efforts put in by the TA but the way it is should be changed a bit as per my opinion. I dont hold grudges with any TA or instructor, nor does GPU programming was a bad experience in terms of grade or otherwise. Its just an opinion for future students help. Rest is all good.

i feel the course content is apt for a 12 credit course. Some reordering of topics might make us more professional like teaching the debugging support and thrust after first few classes. I also feel there needs to be some direction with the assignments and not just coding a given problem. Like A2 was about optimisations but the evaluation was simply based on test cases. A3 seemed like a complex problem and again based on test cases. one slide for setting up of cuda in ubuntu and wsl would help.

The doubt clearing aspect of professor is very good, he waits till all the doubts are cleared. One thing that can be improved is explaining using more writing. That would be very useful

One of the best prof in iit campus and moreover he understand student problems and friendly prof for students like me

Awesome course. The instructor was punctual and explained every concepts very well.

I loved the course and the way it was presented! Particularly I enjoyed the discussion-driven approach of the class

nice course! op prof

very good course

Excellent proffessor

excellent course and professor

he is the best teacher I have seen to date.

The course was structured and handled very well considering the hybrid situation of this semester.

best professor Ive encountered

Rupesh Sir is an excellent teacher and I learnt so much in this course. Although I am from a major program in Electrical Engineering, I was able to follow most of the content covered during the lectures. The assignments are a great boost to the content taught. The course webpage, slides, example codes and the FAQ document aid in getting the best out of the course.

This has been a wonderful course. One of my favourite courses this semester. The only possible suggestion which I might have is to make the grading RG instead of AG. But wrt the course logistics I have no suggestions or points for improvement.

best teacher ,I have ever seen

good

The way learning in this course happened is extremely beautiful. learnt many things from the assignment especially. The problem statements given in the assignment are truly great. The course was well structured and the teaching is the most amazing part of the course. enjoyed every minute of it.
