

## Code Software Testing

- ❑ Ask the owner to show demo and give instructions for installation
- ❑ Install and run:
  - ❑ Execute with data given by the owner
  - ❑ Execute with Random Data (ask or generate yourself)
  - ❑ Execute with data given from Guide or some other use case.
  - ❑ Execute with augmented data
- ❑ Report the finding in a PPT by email to Guide /Owner/others persons involved.
- ❑ Test on 2 different desktops and a laptop.
- ❑ Ensure version number and date provided in main body of code & executable.
- ❑ Minimal amount of documentation provided (with a Readme file having instructions).
- ❑ A configuration file with all default (and recommended range of) parameter values.
- ❑ If OK, upload on Github with link sent to all participants & put on Web (VP Lab).
