Question list
1.The course objectives were stated clearly and met largely
2.The concepts of the course were communicated well
3.The instructor was enthusiastic about the topics presented
4.The examples/case-studies/illustrations used in the class improved the learning experience
5.The quizzes and exams were graded in an impartial and timely manner
6.The instructor was punctual and followed the class schedule closely
7.The course was planned and structured well
8.The course motivated me to explore the subject area with interest
9.The involvement of TAs helped effectively in improving the learning experience
10.Tutorials and assignments were conducted effectively
11.Overall, the course provided a good value-addition to my knowledge/skill-set

NOTE:Qn 1 to 6 - Instructor evaluation : Qn 7 to 11 - Course evaluation

Student Remarks
Assignments seemed pretty tough. Lab assignments were pretty useful. Assignment penalty is 25% per day which is very high. also cd assignment deadline is just after the deadline of remaining courses which left us with less enthu and some stress regarding penalty. It would be good if assignment has some grace days and less penalty per day. Sirs way of teaching is awesome (as usual)
Enjoyed the course a lot. Understood topics very clearly. Assignments are very interesting and learned many basics which we will ignore generally. Best professor.
I had fun.
good he is very good at teaching and we need more Professors like him
I want to thank sir for all his care . The assignments and labs were bit overwhelming.
Rupesh sir GOAT
Nice course ?? and Best Prof, unfortunately I am not interested in compilers or coding so couldnt enjoy the course ??, I wish Rupesh sir was a TCS Prof
Rupesh sir was as always, concise, to the point and patient with all our doubts and queries. I still feel that the necessary intuition and depth that I expected from this course wasnt there, since the textbook followed is fairly old-school and incompatible with modern-day compilers. A flavour of what happens in a small, modern-day compiler would probably be more enriching. The section on optimization was interesting, but again the connection to a real compiler was absent.
There should be some sought of scaling in the quizzes. The weight age of lab is very less. It might be helpful if we had grace days for submissions.
Great teacher
Rupesh sir is an og teacher. I really liked the course and it helped me explore my interests.
The TAs unfairly gave marks to a lot of students when they requested to change their faulty code after grading was complete.
Great course. Made me interested in compilers. Hope to work in compilers in the future.
