Student Remarks
I am really grateful and thankful to professor rupesh nasre for providing this course, particularly to non cs students.It was a great learning experience for me.I wanted to thank the professor whole heartedly from bottom of my heart for providing this course.Professor is very friendly and just awesome. I also wanted the professor to know, eventhough less students attended live online class in later part of course, its just the fact that we have recorded lecs to see at our own comfort and speed.
Course was planned perfectly and taught really well. Thank you sir.
Assignments were very insightful, but revealing test cases would help us a lot. I always though assignments as learning experience but not as a medium for evaluation. Without knowing test cases I have spent more time than necessary. If assignments are seen as an avenue for evaluation, then it is understandableEverything else is very good in the course.
This course for non-CS students was much needed and really helped me to understand the topics. I hope same is conducted for other CS courses too
Really great course! Loved Rupesh Sir's teaching. This course also helped me broaden my thinking capabilities.
Good
Course instructor teaching is well. Only one suggestion would be to explain concepts using diagrams as opposed to hand waving, which is difficult to follow.
Thanking Professor Rupesh for providing this course and being so patient and enthusiastic with all our queries. Hoping this course would be offered next time also. I would love to see other such CSE courses to be offered to non-CSE students. Feedback: The assignments felt really tough for beginners because it required long codes to be implemented whereas we didnt have practice to write even small fragments of code. Also,assignment solutions should be shared sooner so that we can learn from it.
it was a great learning experience.
best prof ever!
sir was kind enough to provide this course to non cse peeps, very nicely taught. clears all our doubts in class itself.. preplaned and very effective teaching.
