Question list
1.The course objectives were stated clearly and met largely
2.Sufficient background material/manuals/instructions/computational resources were available in advance for each class
3.The instructor provided help to understand the concepts involved and to improve my skill
4.Evaluation was done in a fair and impartial manner
5.The laboratory classes were conducted closely following the schedule
6.The course implements the experimental aspects of the relevant concepts effectively
7.The availability and condition of the equipment/computational resources were good
8.The quantum of the work is adequate for the credits involved

9.The course motivated me to explore the subject area with interest
10.Overall, the course provided a good value-addition to my knowledge/skill-set
11.I received adequate support from the technical/laboratory staff
12.I received adequate support from the teaching assistants

NOTE:Qn 1 to 5 - Instructor evaluation : Qn 6 to 10 - Course evaluation : Qn 11 & 12 - TA evaluation

Student Remarks
grading system was too strict i dont liked it and i think makeup lab,5 special assignment, project were unnecessary i think please figure out a way evaluation pattern atleast for students who are learning first I feel more amount of explanation should be given in some topics I feel not explained clearly
rupesh sir is great no no greatest prof
The course was excellent. It helped us improve our programming skills and emphasized clean code. We also learned other utilities like makefiles and gnuplot, which made the course interesting and added to our skill set.A similar course (not exactly the same, but more or less similar), Software Systems Labs, has been offered at IITB for quite a few years. I feel that introducing this course was a good attempt to upskill us too, in those aspects.PS: The BTech TAs were very helpful !
Sir was very good, you could feel the passion he has for the subject and it brought me more interest and fascination towards the subject as well. Many times he went out of the way to keep us interested, like by conducting industry visits, giving special assignments, getting punch cards to the class and giving clear technical knowledge often with the needed background too. Truly a very nice sir.
